THIS IS UNEVALUATED INFORMATION

1. In August 1950 the "April 4" plant, formerly known as the R6kk Machine Factory, dropped all its other work to concentrate on a secret project for the Hungarian government. The number of this project is I-0212, and it involves a quantity of unidentified machine equipment for a factory which will manufacture organic chemical products. The name of the latter factory, which will be located in the Borsod region of northern Hungary, is Szerves Vegyipari Művek (Organic Chemical Works).
2. The drafting work and designing is carried on in several small sections. The teams working in each of these sections are completely segregated and are strictly forbidden to discuss their work with one another. Two members of the engineering staff who attempted to find out more about the project were arrested in the factory and have since disappeared.
3. The task of one section is to draw blueprints for two small feeding containers and a pre-warmer.
4. The original deadline for delivery of all equipment of this project was set by the government for 1 April 1951. The factory has obtained an extension to 1 December 1951, but workers in the plant believe that even this later date will not be met.
5. Materials have been ordered from the Hungarian Chemical Works, Ken utca, Budapest, for Project I-0212.
